Subject: Active Recycling Material Recovery Facility and Transfer Station
(SWIS # 19-AR-1250)
Completeness Determination for Solid Waste Facility Permit Application Package

Dear Mr. Tasiopoulos:

On October 13, 2026, the City of Los Angeles Local Enforcement Agency (LEA) received an application from Active Recycling Material Recovery Facility and Transfer Station for a revision to its Solid Waste Facility Permit (SWFP). The operator proposes expanding the total permitted facility footprint from 0.88 acres to 2.3 acres to incorporate an existing baler and permit the receipt and baling of municipal solid waste (MSW) residuals. The facility's maximum daily throughput will remain unchanged at 500 tons per day (TPD) of municipal solid waste, construction, demolition, and inert (CDI) debris, and green waste, plus 300 TPD of curbside recyclables.

The LEA reviewed the application package according to the solid waste facility permit requirements found in Title 14 and Title 27 of the California Code of Regulations. On October 30, 2026, the LEA made the determination that the application package is complete and correct and ready for filing.

This permit application package contains the following items:

1. **A completed application form (CIWMB form E-1-77).**
   The LEA has reviewed the application and has determined that the operator has properly completed the form. The application contains a statement from Mr. Errol Segal, General Manager, and Ms. Marilyn Segal, Owner, certifying that the application is true and accurate to the best of his knowledge.

2. **A complete and correct Transfer/Processing Report (TPR).**
   The LEA has reviewed the Transfer Processing Report (TPR) of Active Recycling Material Recovery Facility and Transfer Station and has determined it is in compliance with the requirements of 14 CCR 18221.6.

3. **California Environmental Quality Act (CEQA)**
   The City of Los Angeles, Local Enforcement Agency (LEA) had prepared and circulated a draft Initial Study/Mitigated Negative Declaration (IS/MND), State Clearinghouse Number (SCH) 2013111058, for a revised solid waste facility permit on May 30, 2017. The LEA received the first addendum to that MND on March 27, 2023 that would replace the recycled metal with curbside recyclables. On October 13, 2026, the LEA received a second addendum to that MND that would expand the permitted area from 0.88 acres to 2.3 acres to include an existing baler onsite to process and bale MRF residual fines.

   The environmental document as herein amended may be used to fulfill the environmental review requirements of the current MND and associated permit. The LEA made the determination that the project would not have a negative environmental impact on the area. Because the current project meets the conditions for the application of State CEQA Guidelines Section 15164, preparation of a new EIR or ND is not required. Discretionary processing of the revised permit may now proceed with the understanding that any substantial changes in the proposal may be subject to further environmental review.

4. **List of Meeting**
   A joint public information meeting by the LEA and Active Recycling representative(s) has been scheduled for November 18, 2026 at 2:30 PM on a virtual Zoom meeting.

5. **Finding of the Conformance**
   The Active Recycling Material Recovery Facility and Transfer Station facility is listed in the City of Los Angeles Non-Disposal Facility Element.

As required by 14 CCR 21650, the LEA is submitting a copy of the accepted application package as an attachment to this determination letter.

If you have any questions, please contact Ms. Megan Lee at 213-252-3344.

Sincerely,

David Thompson, Program Manager
City of Los Angeles
Local Enforcement Agency
