RE: **TRANSMITTAL OF APPLICATION TO REVISE LARGE VOLUME SOLID WASTE FACILITY PERMIT FOR ACTIVE RECYCLING AT 2000 W. SLAUSON AVENUE, LOS ANGELES, CA 90047-5158**

Dear Mr. Bertoni:

This letter transmits a Full Solid Waste Facility Permit application to allow Active Recycling. to expand its facility from 38,500 square feet to 101,200 square feet on M2 zoned property located at 2000 W. Slauson Avenue, in the South Los Angeles community plan area. The application to revise the Full Solid Waste Facility Permit will be filed with the City of Los Angeles Local Enforcement Agency (LEA) to expand the permit area and allow use of an existing baler to process solid waste. Under Title 14, Section 18105.1.7.1(g) of the California Code of Regulations, this letter shall serve as proof that the City of Los Angeles Planning Department has been notified of the intent Active Recycling, Inc. to modify the operation of a Large Volume Transfer/Processing Facility at 2000 W. Slauson Avenue.

The site has been operating as a large volume solid waste transfer and processing facility since 2017 providing essential solid waste transfer and processing services to the city and its residents. Surrounding land uses include offices, retail commercial and residential to the north (zoned C2-1VL-CPIO), warehouse, commercial and residential to the south (zoned M1-2DCPIO and R1), the Chesterfield Square shopping mall which includes a Home Depot warehouse, Food4Less supermarket, Walgreens drug store, restaurants and retail businesses to the east (zoned C2-2D-CPIO), and a City of Los Angeles Bureau of Sanitation public yard that also functions as municipal disposal yard solid waste transfer facility (zoned M1-2D-CPIO) and single-family residences (zoned R1) to the west.

Under the requested Solid Waste Facility Permit revision, municipal solid waste material will continue to be delivered to the facility where it will be tipped, temporarily stored, processed to recover recyclables and taken to a permitted landfill or other permitted processing facilities for final disposal of beneficial reuse. Recyclable materials recovered are taken to end users or shipped out to commodity markets.

Please feel free to contact me with any questions or comments. I can be reached at (310) 993-1676.

Best Regards,

Larry Miner
